

HOPE Partners of Farmington Awarded \$4,400!

Mission: To bring together volunteers to help our fellow citizens remain connected to the community while at home.

Program Funded:

HOPE partners of Farmington has been awarded a grant of \$4,400, to support the Medical Transportation Expansion Project to help provide seniors with more transportation options.

Expanding medical transportation services to the senior living facilities in town will help a much larger population. Seniors really enjoy being picked up by a volunteer who lives in town, and getting in a car instead of a bus that they struggle to get in and out of. Volunteers provide transportation to routine medical and dental appointments in surrounding towns.
