

Invent the Summer Awarded \$3,200!

INVENT THE SUMMER

Mission: To inspire the next generation of innovators, engineers and entrepreneurs.

Program Funded:

Invent The Summer was awarded \$3,200 to fund a series of 8 in-person STEM workshops in Farmington in the summer of 2025. These workshops will be open to every Farmington child aged 5-12, and will be free of charge. The workshops will be led by trained local high school and college students, helping them to gain valuable experience teaching and mentoring younger children. Invent the Summer strongly believe that the "by kids, for kids" element of our program creates a more engaging, fun, and summer-friendly atmosphere and is very beneficial to all ages involved. They aim for their workshops to feel more like play than a classroom!
